# Shiningintl Alexa speaker operation manual

(general instruction)

## 1. Overview

Shiningintl has two type of Alexa enabled smart speakers , one is the "far field Alexa enabled smart speaker", a far field alexa smart speaker can be waked by saying "alexa" without any hand motion need , there is an Mic-array inside the speaker, the Mic-array can always get the voice signal and analyse the voice to match the wake up word "alexa" , if the speaker detect the "alexa" word in air, it will go into the command waiting mode to wait for voice command.it is really easy to control your smart speaker with voice; the another one alexa enabled speaker is a "near field Alexa enabled smart speaker", the near field alexa enabled smart speaker doesn't support voice wake up, when the users want to interact with the speaker, the users need to press the "Alexa on" button at first, and then speak to the speaker.

**Buttons:**

Normally, the speaker has 4 buttons: power/mode button, volume up, volume down, Alexa on

Power/mode button: press and hold to power the speaker on or off,  press to switch between wifi and Bluetooth after power on.

Volume up: press to adjust volume up

Volume down: press to adjust volume down

Alexa on button: press to activate amazon Alexa and waiting user to speak command. For a far field alexa speaker, the user just need to say "alexa" command, and it is not necessary to press the button. But most of our products have this button on body.

## 2. App Download

Before go ahead the Shiningintl alexa enabled smart speaker, the users need to install an application on its smart

phone(support iPhone and android).The "Muzo player" app lets you play music and audio from streaming services like spotify, iHeartRadio and others. Download the app for your device by searching for the "Muzo player" in the Apple App Store or Google Play store.

Note that this app is designed for mobile devices only, such as smartphones or Wi-Fi enabled tablets. It is not available for use on regular desktop or laptop computers.
